

Abstract

[Abstract]

[Problems]

The invention provides a resin composition containing
5 an aliphatic polyester resin having an excellent heat
resistance and impact resistance and automobile materials,
home electric appliance material parts, and electric and
electronic parts produced from said resin composition.

[Means for solving problems]

10 Production of a specific resin composition (D) having
an excellent heat resistance and impact resistance, containing
an aliphatic polyester resin (A), a polyolefin resin (B) and
a modified polyolefin resin (C) and molding of automobile
materials, home electric appliance material parts, and
15 electric and electronic parts using said resin composition.
